ACADEMIC PROFILE

BS Information Technology graduate (CGPA 3.53/4.00) with practical software development experience. Currently exploring machine learning, computer science research, trustworthy AI, and resource-efficient edge intelligence. Seeking fully funded research-focused Master's opportunities abroad, with a longer-term interest in doctoral study. Research interests are exploratory; no formal research project or publication is claimed.

EDUCATION

University of Agriculture Faisalabad, Sub-Campus Burewala *Graduated 2025*

Bachelor of Science in Information Technology (BSIT) | CGPA: 3.53 / 4.00

Relevant coursework: Programming, Object-Oriented Programming, Data Structures, Database Systems, Software Engineering, Web Technologies, Computer Networks, Operating Systems, Information Security.

Bachelor of Education (B.Ed)

CGPA: 2.88 / 4.00

RESEARCH INTERESTS - EXPLORATORY

- Machine learning and applied AI: model learning, evaluation, generalization, and reliable decision-making.
- Edge AI for livestock activity recognition: efficient classification of movement, feeding, resting, and related behavior from wearable motion signals in limited-resource environments.
- Trustworthy language models: hallucinations, evidence grounding, uncertainty, and knowing when not to answer.
- AI transparency and data provenance: communicating sources, limitations, and the effect of incomplete or outdated information.

SELECTED TECHNICAL AND ACADEMIC PROJECTS

AquaSense AI - Python / Colab | Google Colab ↗ *Learning prototype*

- Explored water-quality datasets, missing observations, preprocessing, and introductory ML evaluation in a Python notebook.

Portable Water-Quality Monitoring System *Final-year project*

- Developed an academic sensor-data prototype gathering pH, turbidity, TDS, and temperature observations.

ShelfAudit - Shopify Store Audit Concept *AI-assisted prototype*

- Designed an early-stage audit dashboard concept for store issues and SEO/AEO workflows; not a production AI research system.

PROFESSIONAL EXPERIENCE

Fusion Funky - Frontend & E-commerce Development *Jul 2025 - Present*

- Work on responsive web interfaces, Shopify store updates, debugging, performance and SEO improvements.
- Collaborate on real projects, review client requirements, and document changes during development.

TECHNICAL SKILLS

Programming & data: Python (learning), JavaScript, HTML, CSS, basic SQL, NumPy, Google Colab, Git/GitHub.

Applied AI: ML fundamentals, data preprocessing, basic evaluation, prompt engineering; LLM reliability and agent workflows (exploring).

Software: Responsive frontend, REST API/JSON fundamentals, Shopify/Liquid, Firebase, SQLite/MySQL basics, debugging.

PROFESSIONAL DEVELOPMENT & ACTIVITIES

Prompt Engineering - Coursera (online course; certificate status not stated).

Active interest in AI hackathons and independent technical learning. Communication, collaboration, problem-solving, and documentation.
